

## DRIVE-ROD UNIT

## 04099

### Functions

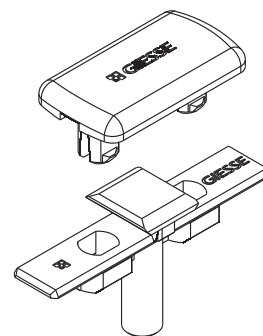

Parts for connection of UNICA one-way cremones with the profile rods of an aluminium window.

### Finish

Base finish

### Packaging

Box of 40 pieces

### Technical Features

The article is used to connect UNICA cremones with one-way movement (in pre-assembled or disassembled versions) to the closing rod of an aluminium window.

This generally concerns Shutter-type outward or Side Hung openings. The Giesse patented rod drive device can be fitted on all sashes with channel 15 - 20.

This system is particularly recommended for all window makers having to reduce fitting and machining times.

The 8 mm diameter pin is 18.5 mm long.

### Parts

Instructions sheet

### Materials

Body in zamak

Nylon clip
