

Blade Multi-Point

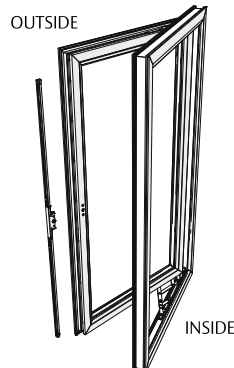

The Blade is the revolutionary new window lock. Redefining expectations of performance and delivering additional new benefits to fabricators, installers and consumers. The Blade offers greater lock engagement for additional security as it connects along the full length of the keep. And, unlike other window locks, the Blade's aluminum channel uses the full depth of the eurogroove to enhance the strength of the window. This means some systems can reach PAS24 without the need for additional re-enforcement.

Features

- Outstanding anti-corrosion performance
- Uses full eurogroove to enhance window strength
- Unique 20mm or 22mm retractable gearbox patented design allows for easy maintenance
- Reversible gearbox
- Keeps can be fitted at any time and do not need marking to ensure greater manufacturing efficiencies
- Fewer fixings than other window locks for faster fitting
- One Blade height suits all applications, reducing stock holding for multi-system users
- A fully retracting blade delivers greater clearances
- The unique geometry and precision engineering eliminates cam clash
- The rotating action and keep engagement eliminates wear and the need for adjustability; speeding up installation and reducing call backs
- Available in an offset variant where lower placed handles are necessary
- Eliminates loss of compression performance
- Gives lock engagement along the full length of the window
- Suitable for sash sizes from 220mm to 1629mm
- Tested to BS EN 1670 Grade 4 (240 hours NSS) and endurance tested to 30,000 cycles

PROJECTING SIDE HUNG (PSH)
